Costco IT
755 Lake Drive
Issaquah, WA 98027

Dear Hiring Manager,

I am writing to express my interest in the Travel Technology Software Engineer Intern position within Costco's IT department. Last week, I had the pleasure of attending your open house event at Issaquah, and it reinforced my interest in joining your team.

What stood out to me the most was not the scale of the technology operations, but rather the way employees across departments spoke of collaboration and long-term growth opportunities. Every conversation I was a part of felt genuine when describing the work culture built on support, success, and each other. Seeing such an environment firsthand and in-person made me confident that Costco is a place where I could grow both technically and personally. I would like to thank everyone I met at the booth for their insight into the internship position as well.

While pursuing my Computer Science degree at Washington State University, I have developed a strong technical foundation in software development, and I am eager to apply what I have learned in a company whose culture I genuinely admire.

Currently, I am a Software Development Intern at Washington State University, extending and maintaining new and pre-existing projects our C# codebase. I have developed features across the frontend, backend, and database layers as well as optimized CRUD operations to improve database efficiency. I also have utilized Azure DevOps for version control and CI/CD workflows.

I am eager to bring my experience to Costco's IT department, and I am confident that my technical background and beliefs align well with your mission of delivering quality products, not just for customers, but for employees as well. Thank you for considering my application. I look forward to an opportunity to discuss how I can contribute to the continued innovation of your team.

With Warm Regards,
Alan Qiu
